WORK EXPERIENCE

There is no relevant work experience. I have experience working in a team - scrum, sprint, weekly standup.
There are also educational and pet projects.

ControlApp
The first experience of application development. On Dart/Flutter.
Pet project, maintaining a journal of author supervision for architects / designers (from the sore).
It was on it that I started learning programming and realized how deep it was necessary to 'dig'.

ControlApp (React) (gh_pages)
Rethinking the application of author control. It is already done on React, using Firebase (authorization, database), TS, MUI, React hook forms.

TodoApp (gh_pages)
ToDo is an application made as a test task for MindBox, according to the tech spec and layout. Made on React, using typescript, classnames(npm) and adding a small number of tests.

Social network (gh_pages)
React educational project.
A small social network.
The functionality is not all, but more than in the course itself. I wrote the logic of adding friends and messaging, myself.

BRIEF INFORMATION

My goal is to become a frontend developer as soon as possible and enjoy my activities.

Strengths – perseverance, stress resistance, focus on results.
Ability to work both in a team and independently.
Find answers to any question. Google and knowledge of English helps me a lot.

No development experience.
I am an architect with more than 10 years of experience. I designed buildings and structures. But that experience may help me only in human relations and taking responsibility.

In 2019, I entered the course - "Game Project Management".
I studied a lot of interesting and new disciplines, which prompted me to study in the future
HTML, CSS and JS (Skillbox, youtube, web).

Then I started looking for my first framework.
I started studying **VUE**, but I didn't have enough fundamental knowledge (flux, state management).
I switched to **React**, there was much more information on it.

Completed the Ylab course.
I am currently taking the RSSchool course.

I devote 3-5 hours a day to learning. I strive to look for up-to-date information (for example, I started by studying redux, but I also reviewed the redux toolkit, used bootstrap and MUI, working with BEM).

EDUCATION

2002-2008
Belarusian National Technical University,
Architecture

2019-2020
HSE / HSBI,
Game Design Management

2022
YLab University / React course

STACK

Languages
HTML5
CSS3 / SCSS
JavaSript
TypeScript (beginer)

Frameworks
React / Redux

Version control and IDE
Git
VS Code

Other
Figma
Photoshop
MUI

STUD. PROJECTS

YLAB University

MindBox test

React Course. Social network

[RSSchool] JS Course (first task)

LANGUAGES

English - C1 advanced
Russian - native
